

The Wellness Medicine Collective

As a matter of community and law, the Wellness Medicine Collective would like to bring to the attention all concerned our matter of intent. We being of well mind, body and surroundings offer more to ourselves and to our community. This newly formed collective is based on the belief that health is formed by habits. We support wellness obtained through positive habits such as proper diet, nutrition, exercise, meditation, council, recreation, environmental exposure and use of holistic medicine.

Of particular interest will be our program to assist local medical marijuana patients in obtaining their preferred form of holistic medicine. We at Wellness Medicine Collective have made a concerted effort to develop our program in compliance with RCW 69.51A and WAC 246-75-010. Our Patient Verification Process and Medication Assistance Procedures are not only straight forward and transparent but also ensure our patient's privacy and security. Medicine will be donated by patients to patients ensuring quality and reliability. Our Patient Need Analysis allows us to set limits for our patients reducing chances of abuse and keeping excess supply from reaching the black market. We are a collective of patients assisting and supporting one another in health and wellness.

We find it unconscionable that the sick, disabled and dying of our community are subject to unprofessional methods of maintaining their medicine supply. Until legislators and policy makers in Olympia are able to rectify medical marijuana laws in the name of patients' rights, it will be up to patients and supporters on the front lines to find creative solutions to these problems.

We humbly request any thoughts that may lead to a better method of operation. Together people can assist one another in improving our blessed community.

Sincerely,

Jacey Hoag

Chairman of the Board
